Education

York University

BEng (Spec. Hons) Software Engineering

Sept. 2019 – Aug. 2025

Toronto, ON

Relevant Coursework

- Web Development
- UI/UX Design
- Software Architecture
- Data Structures and Algorithms
- Software Design
- Object-Oriented Programming

Experience

Green Career Centre

January 2024 – April 2024

Graphic Design Intern

Toronto, ON

- Designed **posters, leaflets, digital graphics, and campaign assets** for sustainability initiatives distributed across major Toronto universities, including **York U, UofT, UTM, and TMU**.
- Collaborated with campus organizations and internal stakeholders to translate **campaign goals** into clear, student-facing visual communications.
- Delivered polished creative assets under tight deadlines, supporting increased **campaign visibility, student awareness, and event participation**.

Projects

Orbit Collision Avoidance Assistant (OOCOA) | React, JavaScript, Node.js, SQL

- Developed a **React-based operational web application** for the **Canadian Space Agency** to support orbital collision risk analysis, workflow management, and data review.
- Designed reusable front-end components to translate **complex aerospace data** into clear tables, visualizations, watchlists, and alert-driven user flows.
- Integrated application functionality with **backend services and SQL databases** to support dynamic data retrieval, structured navigation, and workflow interaction.
- Improved the usability of technical collision-avoidance workflows by prioritizing **clarity, responsiveness, information hierarchy, and efficient UI design**.

Mokatail | React, JavaScript, GSAP

- Developed a **motion-led React website** for a fictional cocktail bar, combining branded storytelling, immersive interaction, and polished front-end execution.
- Implemented **GSAP animations, scroll-triggered transitions, and interactive UI states** to create a cinematic and engaging user journey.
- Built responsive layouts optimized for **desktop and mobile experiences**, with attention to visual hierarchy, pacing, and interface refinement.

StudentYU | Figma, Canva

- Designed a **high-fidelity social platform prototype** to help university students reconnect during the transition back to in-person campus life.
- Conducted user-centered design through **research synthesis, persona development, and feature prioritization** to guide product direction.
- Created intuitive interface flows in Figma focused on **usability, engagement, navigation, and student-centered interaction**.

Tab2MXL | Java, JavaFX, SceneBuilder

- Developed the **dashboard interface** for a desktop application that converts guitar tablature into structured **MusicXML output**.
- Built JavaFX workflows for **file upload, parameter customization, and guided user interaction** using SceneBuilder.
- Collaborated within a team-based software project to align **interface functionality, user requirements, and application logic**.

Technical Skills

Languages: JavaScript, TypeScript, HTML/CSS, Java, SQL

Frameworks/Libraries: React, Node.js, Tailwind CSS, GSAP, JavaFX

Developer Tools: Git, GitHub, VS Code, Eclipse, Vite

Platforms/Technologies: Linux, REST APIs, SQL Databases, WordPress

Design Tools: Figma, Canva, Adobe Creative Suite
